BETTER HOMES
AND GARDENS

Your TV reception depends on your TV antenna. Winegard's patented Colortron antenna delivers bright, sharp pictures in color and black & white. For weak fringe areas, add a Winegard Colortron electronic power pack that amplifies the signals, and reduces picture snow. Winegard Colortrons from \$24.95.

For best FM reception, get a Winegard Stereotron antenna. With a Stereotron antenna and electronic amplifier, you can pull in FM stations from 200 miles. Winegard guarantees the Stereotron to give you finest possible FM or FM stereo reception. Stereotron, only \$23.65—Stereotron power pack \$44.95.

NEW IDEA

*an amazing new home TV
and music outlet system*

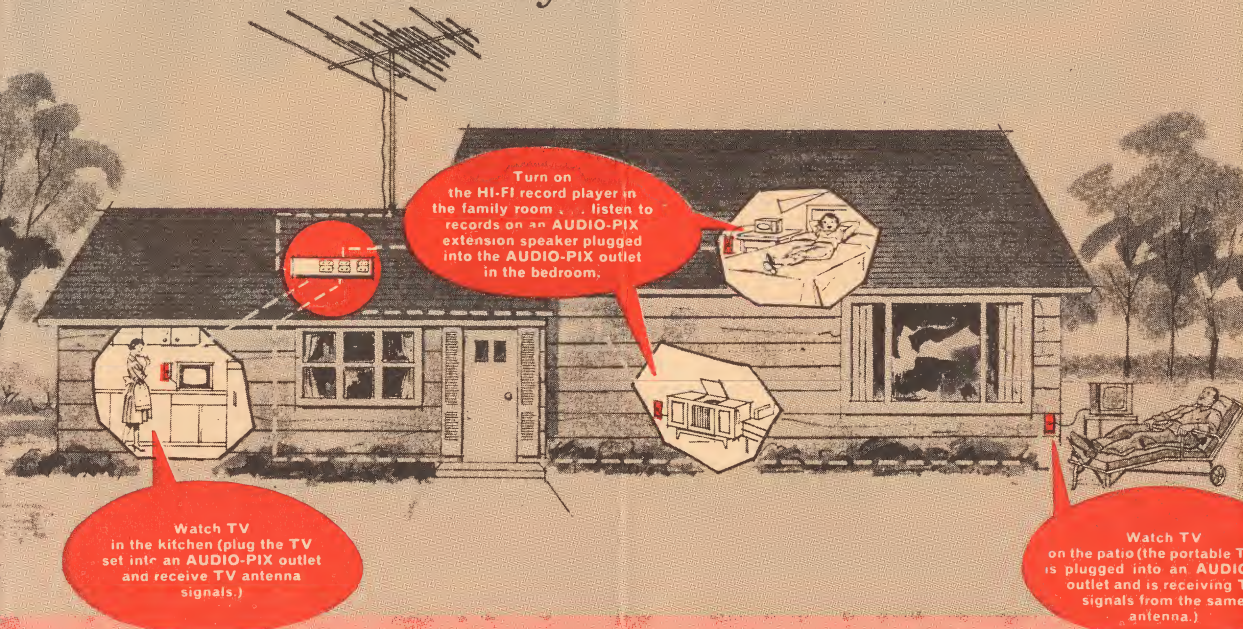

WINEGARD AUDIO-PIX

delivers TV pictures, FM or Hi Fi phonograph music anywhere inside or outside the home over a single wire.

for less than \$50⁰⁰

INCLUDING PORTABLE SPEAKER

Own an Audio-Pix electronic sight and sound home entertainment system . . .

Plug TV set into any AUDIO-PIX outlet. Run one or more sets simultaneously from a single antenna.

Run a Hi Fi (record player, FM or AM, or tape recorder and feed the sound into the system to be picked up at any AUDIO-PIX outlet.)

Plug an FM receiver into the AUDIO-PIX. The AUDIO-PIX serves as an FM antenna signal source, and at the same time automatically feeds the FM sound back into the system to the extension speakers.

AUDIO-PIX is two systems wrapped into one simple, inexpensive installation. It is both a TV-FM system (distributes TV/FM antenna signals) and a HI-FI music system at a price any home owner can afford. No new home is truly modern without AUDIO-PIX.

The AUDIO-PIX is a revolutionary new electronic entertainment convenience for the home which—

- 1 feeds TV (Ch. 2-83) and FM antenna signals to each AUDIO-PIX outlet.
- 2 feeds sounds from a Hi-Fi (record player, FM and tape recorder) to the same AUDIO-PIX outlets.

Winegard's new idea allows TV and FM antenna signals plus music from your Hi-Fi to be carried on a single wire from set coupler to wall outlets. You can operate TV or FM sets in any room in the home, several at the same time if desired, all from a single antenna. Watch your favorite TV programs in one room while the children watch another program on a second set in their room. Or, move a portable TV from room to room . . . plug it in wherever you place the outlets . . . in the kitchen, bedroom, even on a porch or patio.

Additionally, Winegard's new idea allows you to plug in a HiFi record player (or tape deck) at any outlet, and hear the music with full fidelity at any other outlet when you plug in your portable AUDIO-PIX extension speaker.

Audio-Pix outlets are convenient . . . modern . . . permanent . . . color and design perfectly match standard AC electric wall plates. Your TV serviceman can easily install your Audio-Pix system, or you can do-it-yourself with the instructions enclosed.
